

JATIN JAIN

AI Engineer | LLM Applications & RAG Systems

+917466804158 | jainjatin386@gmail.com | LinkedIn | GitHub | Firozabad

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience in building LLM-powered applications, Retrieval-Augmented Generation (RAG) systems, and conversational AI solutions. Developed and deployed a multi-document RAG pipeline using LangChain, ChromaDB, and LLM APIs, alongside AI chatbot and computer vision projects. Skilled in Python, Machine Learning, NLP, and Generative AI, with a strong interest in developing scalable AI applications that solve real-world problems.

WORK EXPERIENCES

Python & AI Intern | Internship Jun 2023 - Aug 2023

Provisioning Tech

- Enhanced intent-recognition reliability in an NLP chatbot module through text preprocessing and model retraining.
- Developed and validated REST APIs using Django, supporting backend integration and application workflows.
- Improved machine learning model performance through preprocessing, hyperparameter tuning, and evaluation benchmarking.
- Authored technical documentation and test cases, improving software quality and deployment readiness.
- Built Python-based automation applications, including a virtual assistant and productivity tools.

Technologies / Skills Used : Python, Django, Scikit-learn, NLP, Machine Learning, Deep Learning, Git, SQL

PROJECTS

Aether — Multi-PDF RAG Pipeline

- Deployed a publicly accessible **RAG application** to production, hosting the backend on Hugging Face Spaces and the frontend on Netlify.
- Designed a **LangChain-based document parsing**, chunking, embedding, and semantic retrieval pipeline backed by ChromaDB for accurate, document-grounded answers across multiple PDFs simultaneously.
- Integrated LLM APIs for context-aware response generation, architecting the retrieval-to-generation handoff for consistent, reliable output.
- Optimized chunk size, retrieval depth, and embedding model choice to reduce query-to-answer latency and improve the end-user experience.
- Built a modular, scalable architecture supporting multiple concurrent document uploads and real-time querying.

Technologies / Tools Used : Python, LangChain, ChromaDB, Hugging Face Embeddings, Flask, Hugging Face Spaces, Netlify

Junoon — Mood-Driven AI Chatbot

- Built an **LLM-powered chatbot** generating responses based on user-selected conversational moods and personalities, integrating LangChain with Mistral AI APIs.
- Applied **prompt engineering** to maintain consistent emotional tone and personality across multi-turn interactions.
- Designed a modular frontend/backend/LLM architecture enabling real-time switching between conversational styles.

Technologies / Tools Used : Python, LangChain, Mistral AI, HTML, CSS, JavaScript

NemiVerse — AI Virtual Assistant

- Developed a **voice-controlled assistant** for executing natural-language commands, enhancing application control, web navigation, and productivity automation.
- Integrated **speech recognition, command processing**, and automation functionalities to streamline user interactions.

Technologies / Tools Used : Python, NLP, Speech Recognition, PyTorch

Junovision — Intelligent Attendance System

Lead Developer

- Developed a **facial-recognition attendance system** that automated identification, attendance logging, and report generation from classroom images, significantly reducing manual administrative effort.
- Implemented face detection, feature extraction, and student identification from classroom images.
- Automated attendance generation and report creation, reducing manual effort and improving accuracy.

Technologies / Tools Used : Python, OpenCV, Dlib, Flask, MySQL

SKILLS

Databases : ChromaDB, MySQL
Frameworks & Libraries : LangChain, TensorFlow, PyTorch, Scikit-learn
Programming Languages : Python, Java, C, C++
Tools & Platforms : Flask, FastAPI, Git, GitHub, SQL, N8N, Zapier

EDUCATIONS

Year	Degree	Institute
2022 - 2026	B.Tech, Computer Science Engineering (AI, ML, DL Specilization)	Teerthanker Mahaveer University
2020 - 2021	Intermediate (Senior Secondary) — 86.6%	Kids Corner Happy Senior Secondary School
2018 - 2019	High School (Higher Secondary) — 91%	Kids Corner Happy Senior Secondary School

CERTIFICATIONS

IBM Skills Network – Artificial Intelligence for Intermediate (2025)

Certification Url : <https://ibmmoooc.skillsnetwork.site/certificates/5b725354-6382-4e45-87b5-4cc1f3c5f489>

Python 3.4.3, Java, Git Training

(Spoken Tutorial Project, IIT Bombay).

Cisco Packet Tracer

(Cisco Networking Academy-2024).

Deloitte (Job Simulation).

AWARDS & ACHIEVEMENTS

- Secured a mock offer letter of ₹5 LPA after clearing the interview round in Samarthya Bodh 3.0, a placement simulation competition.
- Technical Conference and completed the Youth Empowerment & Skills (YES+) workshop.
- Participated in the IEEE 2024
